

Michael Doby received a B.S. degree from Georgia Institute of Technology in 2003 and a Ph.D. from University of Manchester in 2007, both in Chemical Engineering. Currently, Dr. Doby is employed at DuPont Experimental Station in Wilmington, DE in 2007 as a Research Engineer in the Particle Technologies Group. He is an active participant in AFS and AIChE with research interests in solid-liquid separations and bulk solids handling.
