

Rik van Hemmen

Filtration Challenges in the Marine Industry

Rik van Hemmen is a Partner and Vice President in Martin, Ottaway, van Hemmen & Dolan, Inc, a marine consulting firm that has been in continuous operation since 1875. The firm provides consulting services on technical, operational and financial consulting services in the Maritime industry. Mr. van Hemmen provides consulting services to Ship-owners, equipment manufacturers, regulators, underwriters, financiers, shipbuilders and attorneys.

Mr. van Hemmen graduated from Virginia Tech with a degree in Aerospace and Ocean engineering and is a registered professional engineer. He is a fellow in the Society of Naval Architects and Marine Engineers and a Fellow in the National Academy of Forensic Engineers. He holds memberships in many other wide ranging technical societies and has published and contributed to texts in technical design, risk assessment, human factors and decision making strategies.

He is married with three children and lives in Red Bank, NJ where he is active in local environmental issues.
