

BIOGRAPHY

Francis J. DeSilva has been employed in the water treatment industry for over thirty years.

Frank has a Master of Science in Environmental Engineering from New Jersey Institute of Technology and a Bachelor of Science in Environmental Science Technology from Florida Institute of Technology.

Frank holds the position of National Sales Manager for ResinTech Inc., a supplier of ion exchange resins to the O.E.M. market in the United States. He has been with ResinTech, Inc. for about 20 years. Prior to that, he was employed by Belco Pollution Control, a division of Foster Wheeler, serving as Manager of the Process Department. He has authored numerous articles on ion exchange and related topics.

Frank is currently on The Board of Directors of the Pacific Water Quality Association and also serves on their Technical Committee.
