

Roy Weitzell
Watermark Initiative, LLC

Roy Weitzell holds a B.S. in Marine Biology from the University of North Carolina at Wilmington and a M.S. in Zoology from Southern Illinois University at Carbondale. Presently, Mr. Weitzell is the Chief Scientist at Watermark Initiative, LLC. He researches and analyzes water quality and quantity data in support of client projects, and applies the proprietary Hydro Perspective™ to evaluate resources and ensure equitable solutions for all stakeholders. Mr. Weitzell is an accomplished field biologist with approximately 15 years of professional experience in water resources and aquatic species management. He has published numerous scientific papers and technical reports on aquatic ecosystems, watershed planning and conservation efforts.
