

## **Product Manager – Biological Air Treatment**

The Product Manager, Biological Air Treatment - will define the scope and nature of the product specifications as well as start-up and operating procedures for the applicable technology. He/she will guide and manage the successful commercialization of this technology on a global basis. Working with other marketing resources, the Product Manager will develop and implement training materials for sales, marketing and customer use. Working in harmony with Market and Sales Managers, he/she will contact potential key customers to assure the effective communication of Purafil's capabilities in Biological Air Treatment to the Municipal and Industrial Wastewater Markets, and assist in the start-up of Purafil BAT equipment sold.

### **Responsibilities:**

- Develops written Product Line Specifications for successful commercialization of Purafil's BAT technology in target markets.
- Develops written Product Line Training Materials for successful commercialization of Purafil's BAT technology in target markets.
- Develops written Product Line Operating and Maintenance Instructions for successful start-up and use of Purafil's BAT technology in target markets.
- Works closely with Marketing, R&D and Engineering to define the scope and capability of this technology to keep abreast of market trends.
- Working with internal and external resources, create effective market based training and sales tools for Purafil BAT technology.
- Guides sales/account and market managers through initial sales contacts with key customers to assure success of the BAT program.

### **Required Education/ Experience:**

- Bachelor's degree in Applied Environmental Biology or Microbiology, or Biochemistry, MS preferred
- 3-5 years experience in Design and Operation of Biological Filtration Systems (Biofilters or Bio-Trickling filters)
- Proficiency in Microsoft Office Suite
- The ability to travel up to 35%
- Excellent written and verbal communication skills
- Goal Driven, Self-starter with ability to thrive in a team environment
